Hello.
I'm a web Developer
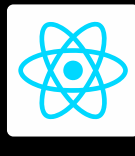

I build things for web

Resume

ABOUT

Frontend Developer specializing in modern JavaScript and React.js, with 1+ year of experience crafting high-performance, scalable web applications.

Skilled in Tailwind CSS, HTML5, and CSS3, with a strong focus on responsive design, accessibility, and cross-browser compatibility. Passionate about transforming UI/UX designs into seamless, interactive experiences through clean, maintainable code.

Collaborative team player who bridges the gap between design and backend development to deliver optimized, user-centric solutions. Eager to bring technical expertise and innovative problem-solving to a forward-thinking engineering team.

Selected Projects
Some things I've built so far

PLIT LEARN
(Educational Website)

A full-stack educational project designed to showcase the institution, different courses, and key information about Plit Learn. Built with React js, JavaScript, Tailwind CSS and a Python backend, the website enhances the institution's online presence and a seamless user experience. Notable achievements include improving user engagement by 25% over three months. Developed a payment API with React js, increasing seamless payment by 40%.
